

Will you inflate balloons purchased somewhere else?

We only use and inflate balloons of “**The Very Best**” **professional quality grade** for all of our balloon decorations.

We do not inflate balloons from “outside” to build balloon structures, or inflate balloons with Helium, unless they are **professional quality grade balloons**. We will, however, make an exception and inflate balloons you purchased elsewhere for balloon bouquets with the acknowledgement that you understand that when we inflate balloons from “outside”(less than **professional quality balloons**) they do not have the same quality and integrity as the balloons we normally use.

Therefore, the price to inflate balloons is the same regardless if we inflate balloons that are yours or ours. Because of the uncertainty of the quality of the balloons you provide us with, it is agreed upon that any balloons that pop during inflation, will still count in the total number of balloons inflated and charged for (an additional charges may apply if the balloons are to be replaced for the popped balloons during the process).
